

Adding iPad to system Setup Guide:

1. When “Crestron Go Tablet” App is opened, the following screen should appear:

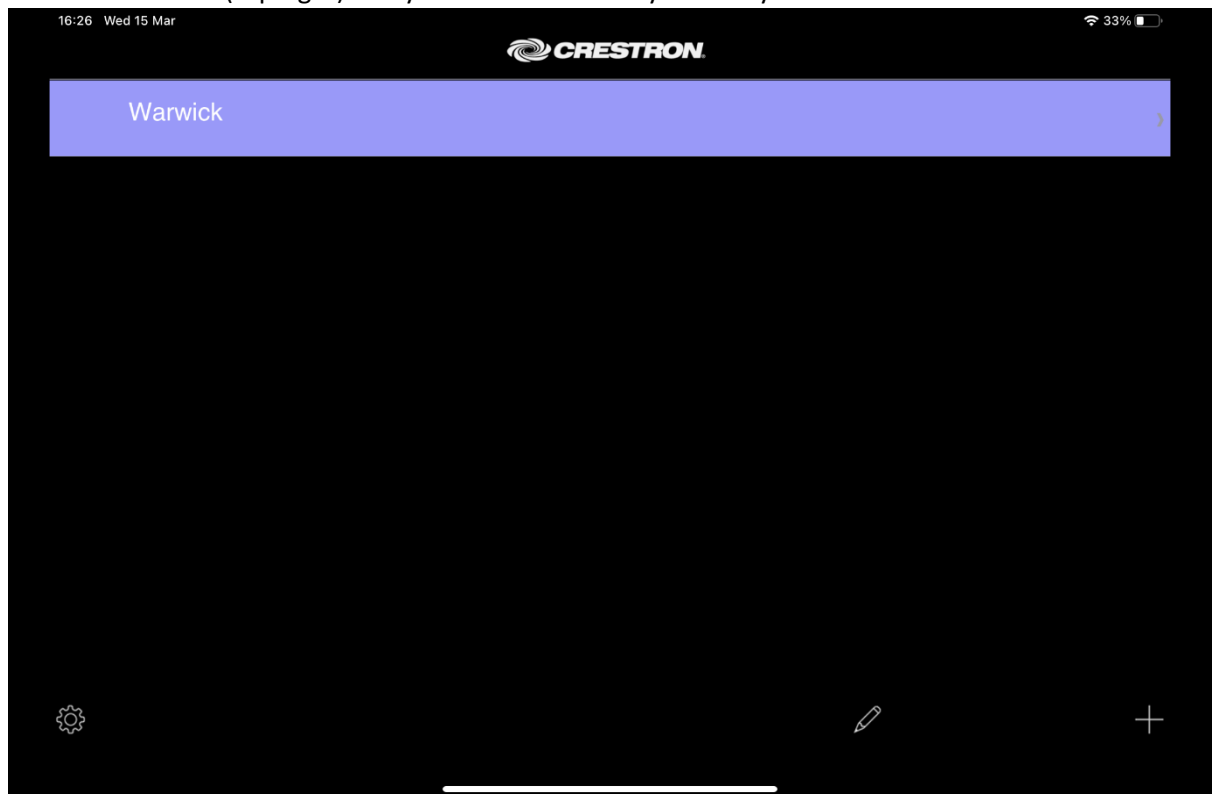

2. To add a new entry, press the “+” button, this should bring up the following screen:

A screenshot of the 'Add Location' screen in the Crestron Go Tablet app. The status bar at the top shows the time 16:25, date Wed 15 Mar, and battery level at 33%. The screen has a 'Back' button in the top left and a 'Save' button in the top right. The main form contains several fields: 'Friendly Name / Location' with the value 'Warwick', 'Use Local Project' with a toggle switch set to 'OFF', 'Host name or IP Address' with '172.16.30.101', 'HTTP Port' with '443', 'IP ID' with '10', 'CIP' with '41796', and 'Room ID' which is empty. Below this is a section for 'Address 2 (Typically Internet/Mobile)' with fields for 'Host name or IP Address', 'HTTP Port' (443), 'CIP' (41796), and an 'Enabled' toggle switch set to 'OFF'. At the bottom, there is a section for 'Enable SSL' with a toggle switch set to 'ON', a 'User Name' field with 'smartcomm', a 'Password' field with masked characters, a 'Confirm Password' field with masked characters, and a 'Widget' toggle switch set to 'OFF'.

3. Fill out all fields with following data:
 - a. Friendly Name: "Warwick"
 - b. Use Local Project: Toggle to "OFF"
 - c. Host Name or IP: 172.16.30.101
 - d. HTTP Port: 443
 - e. IP ID: 10
 - f. CIP: 41796
 - g. Enable SSL: Toggle to "ON"
 - h. User Name: Smartcomm
 - i. Password: 5m@rtc0mm
 - j. Confirm Password: 5m@rtc0mm

4. Hit "Save" button (top right) and you should now see your entry:

5. Press the entry to connect to the system
